

*Bonnie Schafman-Janowiak graduated from Lewis & Clark College, in 1992 with a major in chemistry. She spent two years working for the USDA on wheat genetics before earning a Master's in Synthetic Organic Chemistry from Washington State University. She then went on to work in Analytical Environmental Chemistry at the University of Idaho before attending Purdue, where she earned a Doctorate in Physical Organic Chemistry in 2008.*

*For two years Bonnie worked in research and development for Lonza, Inc. before moving back to environmental science, working as a Senior Project chemistry consultant for Groundwater & Environmental Services, where she is currently employed.*

*Bonnie has authored seven peer-reviewed literature publications, been instrumental in multiple EPA investigations and accreditations of small use agricultural chemicals, and worked with the Interstate Technology and Research Council (ITRC) on protocols and guidance for remediation of recalcitrant environmental pollutants.*

*Beyond her career, Bonnie is involved in her community as a member of multiple organizations to support refugee causes, she actively advocates for special education in K-12 grade and she and her husband have been foster and adoptive parents for a decade.*
